

Downgrade to OFW3.41 from

Rogero 3.55CHECKOFF Manual

Please assure your PS3 is downgraded to Rogero 3.55CHECKOFF by E3 flasher.(if current system is E3 JB2CFWCHECKOFF, you can change to Rogero 3.55CHECKOFF under Recovery MODE)

1:Download files :

<http://115.com/file/c2rggq1d#> (include OFW3.41)

2: Copy Downgrade E3 CFW 3.55.pkg file into the root directory of USB disk, choose install pkg files from ps3 XMB.

3: Run downgrade e3 3.55cfw program, the screen will be black, you will hear three beeps, and ps3 will be back to XMB again.

4: Enter setting menu, choose networking setting, and press those keys on joypad at same time :

D-PAD down+ L1+L2+R1+R2+L3, 3 new options will come out if successful. (if failed, you need run step3 and step4 again)

5: Enter the debug setting, set system update debug option to ON, and shut off PS3.

6: COPY the OFW3.41 file into USB disk, under PS3\UPDATE directory. Insert the USB disk into PS3, and enter Recovery MODE, install the 3.41OFW from system update option .

7: Press SELECT+START to start update, the ps3 will run OFW3.41 directly after update completed.

8: Please delete the Downgrade E3 CFW 3.55.pkg program after entering the OFW3.41 system.

9: You can upgrade to any 3.55 FW now, include JB2CFW, 3.55OFW and others. Sure you can even upgrade to latest 4.11OFW.

Notice : After downgrading to OFW3.41, the old game which stay in HD won't change, so you can run old game again after upgrade to 3.55CFW .
