

How to identify fake iEDGE products

The logo for iEDGE, featuring the lowercase letter 'i' followed by 'EDGE' in a bold, sans-serif font. The 'i' is stylized with a vertical bar and a dot. The 'E' and 'G' have horizontal bars that extend to the right, and the 'D' has a vertical bar on the left. The 'E' and 'G' have horizontal bars that extend to the right, and the 'D' has a vertical bar on the left.

iEDGE

REAL

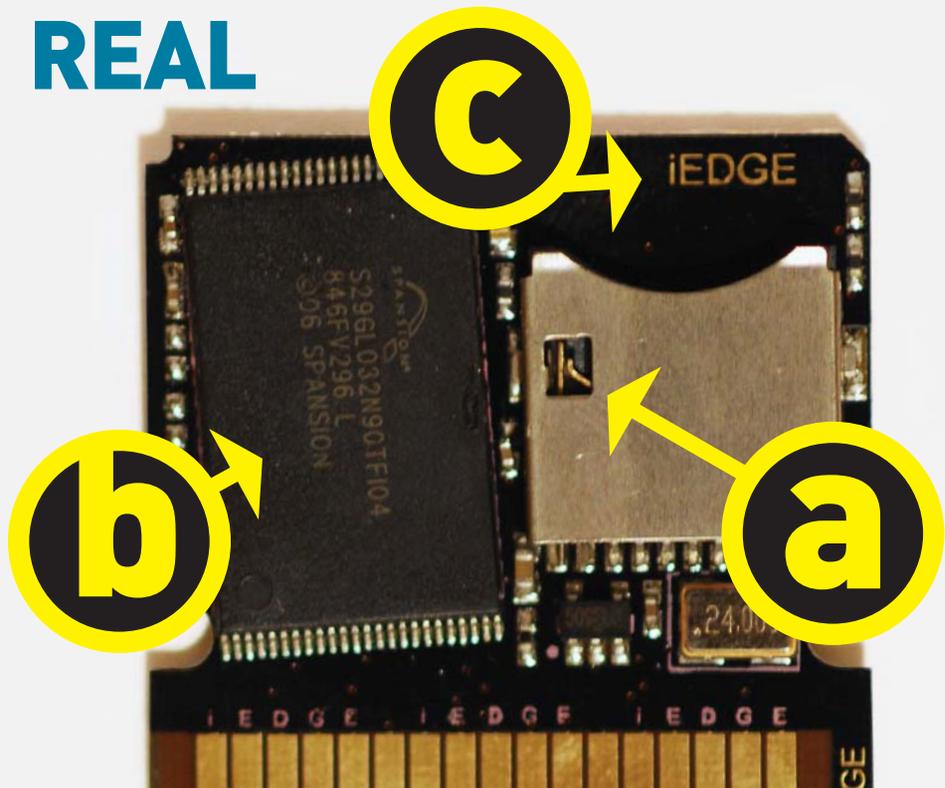

The real iEDGE cartridge casing is secured by three screws, ensuring better fit and durability.

FAKE

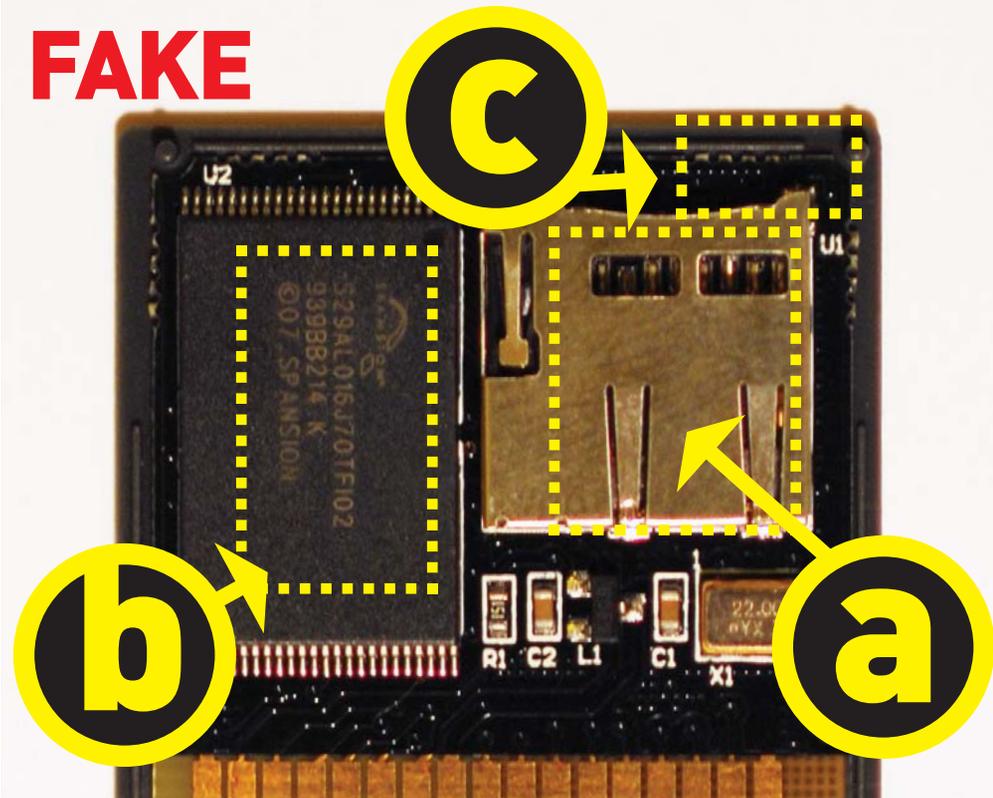

The fake iEDGE snaps together and breaks easily caused by absence of screws, normally used to secure the casing.

REAL

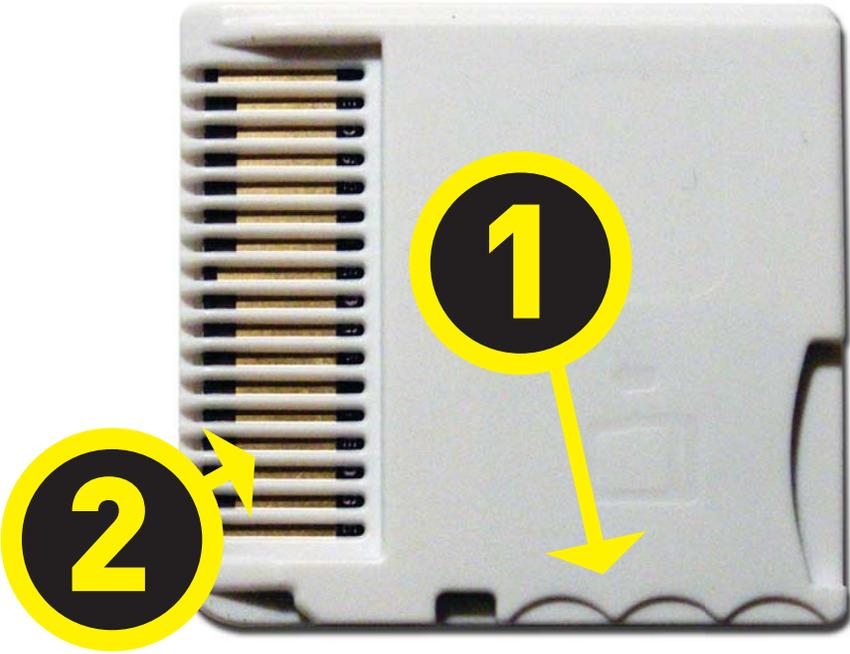

FAKE

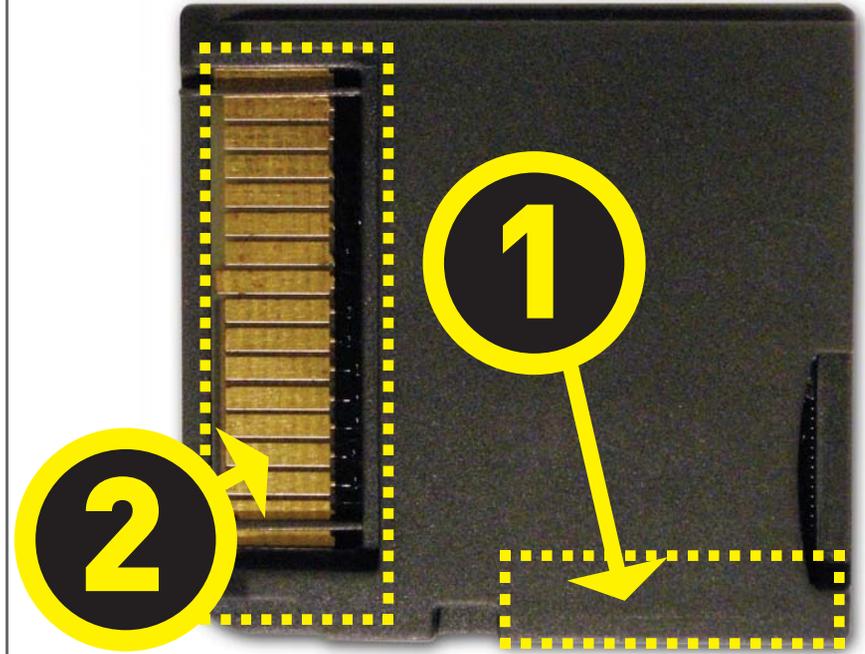

- a.) The real iEDGE uses a non spring loaded Micro SD slot ensures longer life span and prevents card slot insertion failures.
- b.) We use a different type of flash to the fake iEDGE cart.
- c.) The real iEDGE has an iEDGE marking at the mouth of the Micro SD slot.

REAL

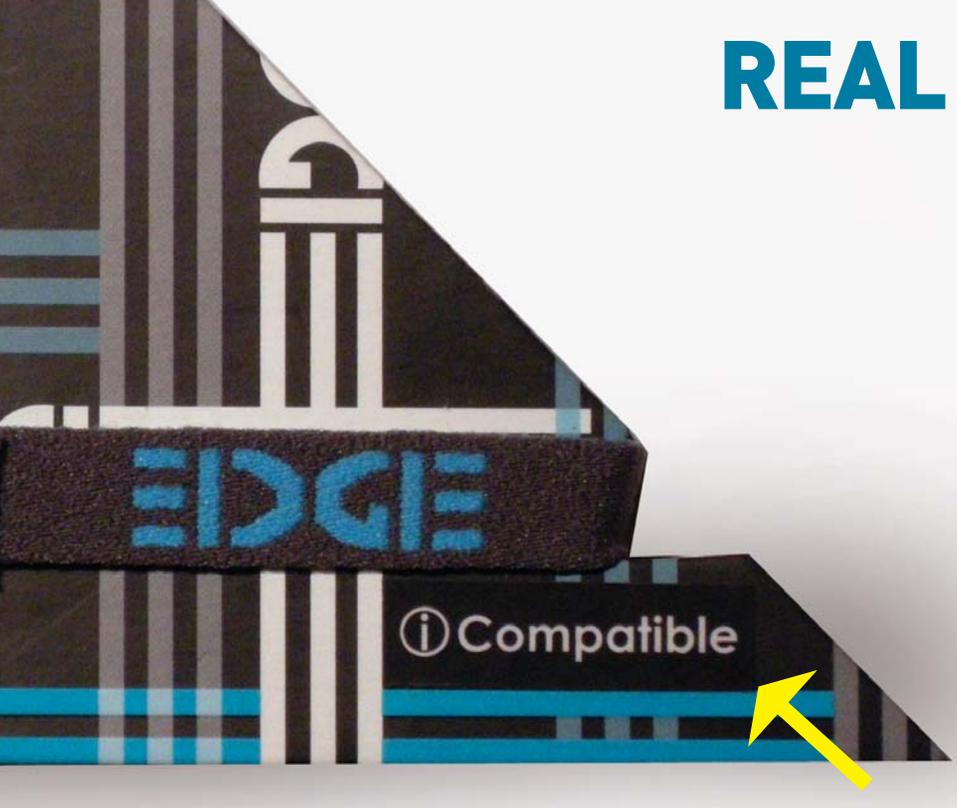

FAKE

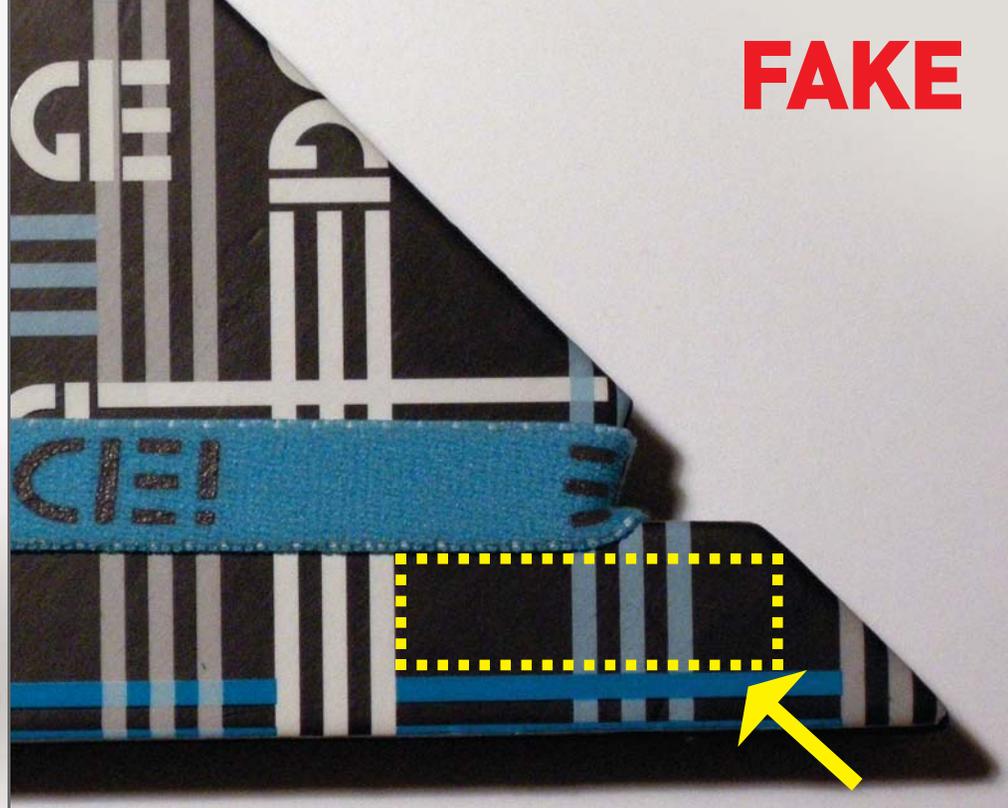

- 1) The real iEDGE has three semi-circular indents on the bottom right hand corner of the plastic casing.
- 2) Our cartridge has all plastic fins intact along the width of the NDS gold plated connection strip

REAL

FAKE

The real iEDGE box has a small rectangular sticker, saying " i compatible".

REAL

FAKE

The real iEDGE elastic fabric band is embroidered and has grey on the front and blue on the back.

REAL

FAKE

Text on the reverse of the real iEDGE box is different to that of the fake.

REAL

FAKE

The real iEDGE plastic casing is only made in **white** plastic, whereas the **fakes** seen to date in the market are all **black!**

Non visible differences: Good reasons why you shouldn't buy fake iEDGE products!

The fake iEDGE uses completely different software and hardware code to that of the real iEDGE. This means that should you purchase a fake you will have the following

DISADVANTAGES:

- 1) The real EDGE brand is well respected for keeping the compatibility of its products at the forefront of the industry. The fake product cannot use our software and will never be supported.
- 2) The real iEDGE has an update mechanism to defeat the latest DSi firmware protections. The fake does not have this feature.
- 3) The real iEDGE build quality is second to none. The fake is poorly built and prone to failures.
- 4) The real iEDGE is backed by a 12 months' warranty. The fakes warranty is non-existent.
