

How to tell if your iEDGE is genuine - please read!

Front of the box

The real iEDGE box has a small rectangular sticker, saying " i compatible".

The real iEDGE elastic fabric band is embroidered and has grey on the front and blue on the back.

Back of the box

Text on the reverse of the real iEDGE box is different to that of the fake.

The back of the box for the original iEDGE and fake iEDGE also has some distinct differences.

- The real iEDGE only has two lines of text on the back of the box towards the bottom, and lists the website at <http://www.edge-ds.cn> (the official website)
- The fake iEDGE has operating instructions on the back of the box including directing users to the fake website at <http://www.edgei-ds.cn> (the FAKE WEBSITE)

Take a look at the Cartridge.

REAL

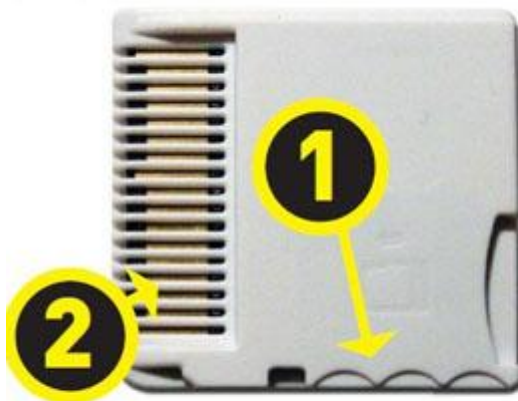

FAKE

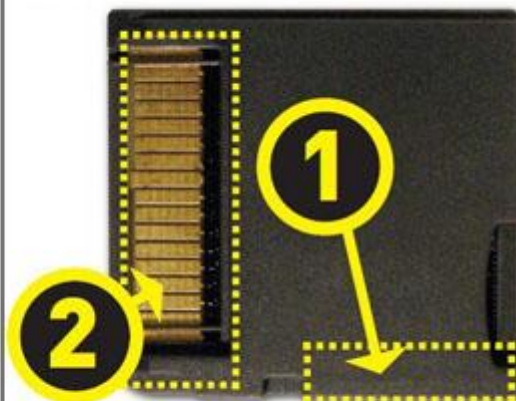

The real iEDGE plastic casing is only made in **white** plastic, whereas the **fakes** seen to date in the market are all **black**!

REAL

FAKE

1) The real iEDGE has three semi-circular indents on the bottom right hand corner of the plastic casing.
2) Our cartridge has all plastic fins intact along the width of the NDS gold plated connection strip

REAL

FAKE

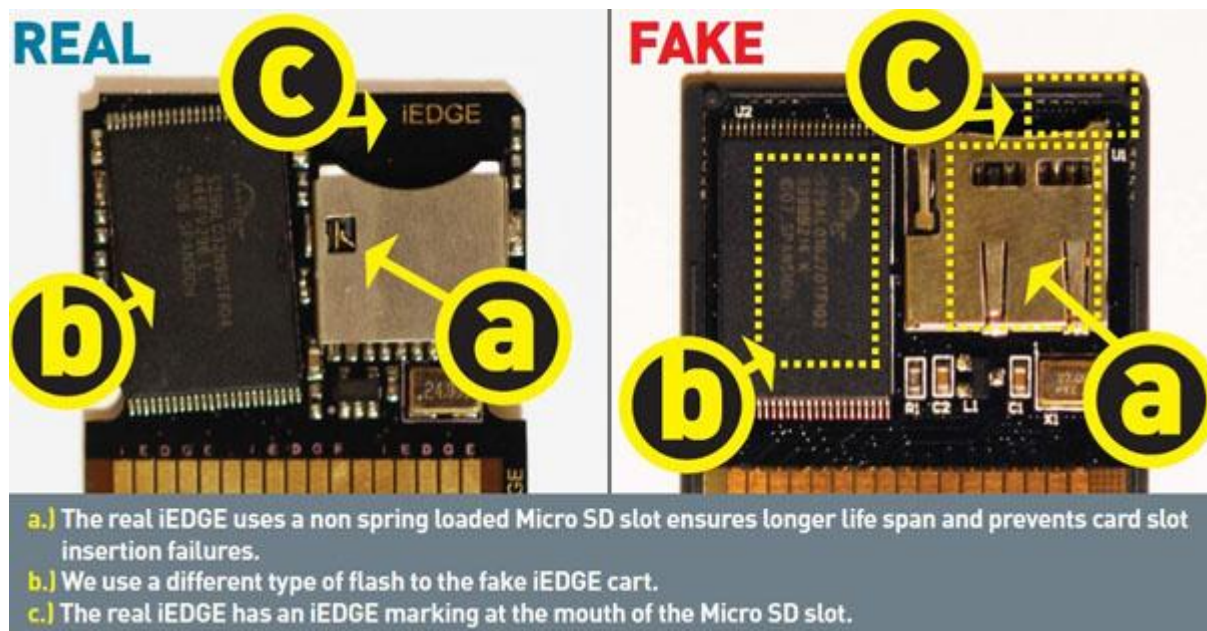

The real iEDGE cartridge casing is secured by three screws, ensuring better fit and durability.

The fake iEDGE snaps together and breaks easily caused by absence of screws, normally used to secure the casing.

The real iEDGE build quality is second to none. The fake is poorly built in comparison.

Take a look at the inside.

- The real iEDGE has is updateable. The fake does not have that feature.
- The real iEDGE build quality is second to none. The fake is poorly built and prone to failures
- The real iEDGE is backed by a 12 months' warranty. The fakes warranty is non-existent.

Take a look at the loading screen.

The easy way to tell a (correctly working) real or fake iEDGE card is to see what the icon is when you start up your Nintendo DS or Nintendo DSi console. The real iEDGE shows "MechAssault Phantom War" while the fake iEDGE shows "Danny Phantom".
